

Lab 2

Movie Review

Mark-up text content from a movie review with semantic elements in a new HTML document.

Instructions:

- Create a new HTML document with all of the required pieces (doctype, head, body, character encoding)
- Call this file index.html and place in a folder named appropriately (no uppercase letters, no spaces, no special characters)
- Choose a movie you like and search for a review on <https://www.imdb.com/>
- Locate the following pieces of information from the review
 - Which movie is it for?
 - What is the title of the review?
 - Paragraphs?
 - Are there any other pieces of information to include like author, date, rating etc.
- Decide how to *describe* the different pieces of text content by *wrapping* them in HTML element tags in your new document.
 - *Choose* from: header, footer, section, article, main, div, h1-h6, p
- Validate your HTML document before compressing the file
- Submit the zip folder to blackboard under Lab 2

Evaluation:

Lab is completed and submitted by the end of the day = complete (1%)

Labs are graded on a complete/incomplete basis and are each worth 1% of your final grade.
